

Preliminary Technical Leaflet

WorléeAdd VP 6236

Art.-No. 114009-18258

Revision: 23.03.2015

W'Add VP 6236 is a most efficient modified silicone defoamer for solvent based and solvent free coatings of different composition.

Technical Data:

Appearance	clear to slightly turbid, slightly yellowish liquid
Flashpoint, DIN EN 22719	approx. 80 °C

Properties and Application:

W'Add VP 6236 is mostly used in solvent free 2K PU-systems. It is especially compatible for reactive thick-film coatings (e. g. floors) and highly filled paint systems . Dosage: 0.5 - 1.0 % on total formulation.

Storage and Stability:

At appropriate storage in unopened original containers W'Add VP 6236 can be used unrestricted at least 12 months counted from the day of the delivery.

Stir before use.

The product described in this preliminary technical data sheet is a trial product which has not yet been industrially manufactured. Worlée-Chemie GmbH has not yet been able to monitor performance over a sufficiently long period and therefore, cannot accept liability or provide a warranty for the product, in particular on its suitability for specific applications.
